DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed. The title should include at least one technical, or inventive, feature of the claimed instant invention.
2. The abstract of the disclosure is objected to because "is disclosed which" is unnecessary and "it move" is grammatically incorrect. Correction is required. See MPEP § 608.01(b).

Claim Objections

3. Claims 15 and 20 are objected to because of the following informalities: the first term in claim 15 should be capitalized and claim 20 is missing a period at the end thereof. Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-3, 12-14 and 18 are rejected under 35 U.S.C. 102(b) as being anticipated by Putman et al. (US 5,474,341). Disclosed is weight **64**, link **24,34**, latch **44**, and fastener support **28**.
6. Claims 19-23 are rejected under 35 U.S.C. 102(b) as being anticipated by Pracchia (US 4,155,584). Disclosed is a mountable actuator comprising weight **72,74** and link **88**.
7. Claims 1-4, 9, 12-14, 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Blough (US 4,538,512).

Art Unit: 3727

Disclosed is weight **42**, fastener support **40**, a fastener extending to the fastener support and a link extending from the fastener support to the weight. The link is pivotally connected to the container at the latch second end located at the fastener support.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. Claims 8 and 15-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Blough.

Blough teaches the claimed container except is silent regarding specific angles of inclination and angles at which the weight shifts.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to set forth shifting of the weight at desired angular inclinations as appropriate for the weight of the weight.

Allowable Subject Matter

10. Claims 5-7, 10, and 11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Various containers and latch assemblies having features similar to that disclosed and/or claimed are cited for their disclosures.

12. In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office Actions directly into the Group at (703) 872-9302 or (703) 872-9303 for after

final amendments. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a PTO deposit account. Please identify the examiner and art unit at the top of your cover sheet. Papers submitted via FAX into Group 3720 will be promptly forwarded to the examiner.

13. It is called to applicant's attention that if a communication is faxed before the reply time has expired, applicant may submit the reply with a "Certificate of Facsimile" which merely asserts that the reply is being faxed on a given date. So faxed, before the period for reply has expired, the reply may be considered timely. A suggested format for a certificate follows:
